

Jaswanth Koorapati

Software Engineer | Portfolio: Jaswanth

Email: jaswanthkoorapati1999@gmail.com LinkedIn: LinkedIn/In/Jaswanth Mobile: +1 940-629-3868 Place: United States

SUMMARY

Experienced Software Engineer with 4+ years of experience in backend development, cloud-native applications, and machine learning solutions, specializing in Python, SQL, Spark, and AWS services. Increased operational efficiency by 33% through scalable ETL automation and optimized data processing frameworks. Delivers secure, high-performance, and reliable enterprise solutions that enhance system scalability, strengthen application performance, and drive measurable business outcomes across finance and healthcare domains.

TECHNICAL SKILLS

- **Programming & Scripting Languages:** Python, Shell, Bash Scripting
- **Cloud Platforms & Services:** AWS, C2, EMR, ECR, ECS, Glue, Secret Manager, CloudWatch, IAM
- **Databases:** SQL, SQL Server, PostgreSQL
- **Machine Learning:** Spark MLlib, Scikit-learn
- **Version Control:** GitHub

PROFESSIONAL EXPERIENCE

IBM
Software Engineer

Bengaluru, India
September 2023 - August 2024

- Architected high-throughput Python data pipelines that automated enterprise transaction processing and strengthened operational data reliability.
- Optimized SQL-driven data models and backend services across finance and retail accounts, accelerating analytical reporting cycles by 27%.
- Remediated large-scale Spark MLlib workload latency on AWS EMR by refactoring transformations and partition strategies to stabilize distributed processing.
- Directed cross-functional delivery efforts across 8-member engineering squads and business stakeholders, achieving milestone adherence across release cycles.
- Engineered ETL automation and observability frameworks using Python, AWS Glue, CloudWatch, PostgreSQL, and GitHub, increasing operational efficiency by 33%.

Carelon Global Solutions
Software Engineer II

Client: Elevance health
August 2020 - August 2023

- Developed secure healthcare application features to support insurance claims processing, member eligibility validation, and provider data management across enterprise systems.
- Designed backend services using Python and SQL for claims validation and benefit configuration within AWS environments, improving application performance by 25%.
- Resolved inconsistencies in claims adjudication workflows by refactoring business rules and automating validation scripts with Python and Bash, strengthening system reliability.
- Collaborated with cross-functional Agile teams of 10+ engineers, QA analysts, and product stakeholders to deliver compliant healthcare releases, achieving on-time sprint completion.
- Implemented scalable microservices and automated deployment workflows using Python, AWS, PostgreSQL, and GitHub, reducing deployment effort by 30%.

PROJECTS

Comprehensive E-Commerce Platform Development

May 2024 – July 2024

- Established a scalable e-commerce platform using React, Node.js, Express, and MongoDB with authentication and product catalog features.
- Implemented dynamic cart management and Stripe-based payment integration with JWT authentication to strengthen checkout security.
- Considered real-time notifications and order tracking using WebSockets and REST APIs, increasing user engagement by 40%.
- Enhanced recommendation and discount logic through analytics-driven testing, improving response time by 25%.

Graph-Based Airline Route Optimization System

January 2024 – March 2024

- Advanced a C++ application to model airline networks using graph data structures and Dijkstra's algorithm to enable efficient route queries.
- Executed shortest-path and multi-city routing logic with connection constraints by optimizing adjacency list traversal, reducing path computation time by 30%.
- Considered graph search workflows and validated outputs using structured test cases in collaboration with peers to ensure reliable query handling.
- Improved pathfinding algorithms and tested edge cases for multi-source meeting city selection, improving overall system performance by 25%.

EDUCATION

Master of Science in Computer Science
University of North Texas

August 2024 – May 2026

Bachelors of Technology in Computer Science
Jawaharlal Nehru Technology University, Anantapur

August 2016 – October 2020
